

Metrics Cheat Sheet

Introduction

This cheat sheet is designed to serve as a quick reference for key metrics, helping you track product growth, make data-driven decisions, and optimize your strategies efficiently.

Acquisition	
Metric	Description
Customer Acquisition Cost (CAC)	The total cost of acquiring a new customer, including marketing and sales expenses
Conversion Rate	The percentage of users who take a desired action after visiting a website or app
Leads Generated	The number of potential customers generated from marketing efforts
New User Sign-Ups	The total number of new users acquired over a specific period
Traffic Source	The breakdown of where new users are coming from
Cost Per Lead (CPL)	Measures the cost of generating a potential customer lead
Customer Acquisition Payback Period	The time it takes to recover CAC through revenue from a customer
Activation Rate	The percentage of users who complete key onboarding actions that indicate they've experienced the product's value and are "activated"
Time to 'Aha!' Moment	The time it takes for a user to reach the moment when they first experience the core value of your product, often crucial for turning sign-ups into engaged users

Activation	
Metric	Description
Onboarding Completion Rate	The percentage of new users who complete all key onboarding steps to start using the product.
Time to First Key Action	The average time it takes for a new user to complete a crucial in-product action after signing up.
Product Usage in First Week	Measures how frequently a new user interacts with core features during their first week of use.
Feature Adoption Rate	The percentage of users who engage with specific features after completing onboarding.
Activation Rate	The percentage of users who achieve the initial milestone that signifies product activation (e.g., setup completion).

Engagement	
Metric	Description
Daily Active Users (DAU)	The number of unique users interacting with a product daily
Monthly Active Users (MAU)	The number of unique users interacting with a product monthly
Session Duration	The average amount of time users spend in the app or on the platform during a session
Pages/Screens Per Session	The average number of pages or screens viewed in each user session
Feature Engagement Rate	The percentage of users who interact with a specific feature
Stickiness (DAU/MAU Ratio)	This ratio shows how engaged users are by comparing daily to monthly usage
Customer Satisfaction (CSAT)	Measures customer satisfaction with a product or service, often collected via surveys
Net Promoter Score (NPS)	Gauges customer loyalty by asking how likely users are to recommend your product to others
Drop-off Rate	Measures how many users abandon your product at various stages of interaction

Referral	
Metric	Description
Referral Rate	The percentage of users who successfully refer new customers to the product.
Referral Conversion Rate	The percentage of referred users who sign up or take a desired action after being referred.
Viral Coefficient	Measures how many new users each existing user brings in through referrals.
Net Promoter Score (NPS)	A survey metric that measures user satisfaction and likelihood to recommend the product to others.
Social Shares	The number of times users share your product or content on social media platforms.
Referral Program Participation Rate	The percentage of users who engage with a referral program when it's available.
Average Referrals Per User	The average number of new users that each existing user refers over a specific period.

Retention	
Metric	Description
Cohort Retention Rate	Tracks retention of a user cohort over time, showing how trends vary based on signup date.
Churn Rate	The percentage of users who stop using a product or cancel their service over a given period.
Customer Retention Rate (CRR)	The percentage of customers who continue to use a product after a specific time period.
Net Dollar Retention Rate (NDRR)	Tracks recurring revenue from existing customers, factoring in upgrades, downgrades, and churn to show net growth or decline.
Repeat Purchase Rate	The percentage of customers who make more than one purchase over a specified timeframe.
Time to Value (TTV)	The time it takes for a user to achieve the first meaningful outcome from the product.
Customer Health Score (CHS)	A predictive measure combining multiple factors like engagement and support tickets to estimate how "healthy" or loyal a customer is.

Revenue	
Metric	Description
Average Revenue Per User (ARPU)	The average amount of revenue generated per user over a given period.
Customer Lifetime Value (LTV)	The predicted total revenue from a customer over the lifetime of their engagement with the product.
Revenue Growth Rate	The rate at which revenue increases over time, usually measured quarterly or annually.
Churned Revenue	The amount of revenue lost due to customers discontinuing the service.
Average Order Value (AOV)	The average amount spent by customers per transaction.
Gross Margin	The difference between revenue and the cost of goods sold (COGS), showing profitability.
Revenue Per Paying User (RPPU)	Similar to ARPU but focuses only on users who made purchases, useful for freemium models.
Gross Merchandise Volume (GMV)	Total value of transactions over a period (for e-commerce or marketplace products).
